The Complexion

TOO LATE

Death only a matter of short time. Don't wait until pains and aches become incurable diseases. Avoid painful consequences by taking

GOLD MEDAL WARMER OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles—the National Remedy of Holland since 1896. Guaranteed. Three sizes, all druggists. Look for the name Gold Medal on every box and accept no imitation.

SPECIAL MEDAL FOR THIS DOG

St. Bernard Forgot Eternal Feud With Cat Family and Braved Flames to Save Pussy.

The supply of Carnegie hero medals would soon give out if all the brave and thoughtful dogs were remembered. A St. Bernard in the town of Everett, Mass., mindful of the traditions of snowbound travelers and his Alpine monastery, has just effected a triple rescue that entitles him to whatever dogdom can offer in the way of canonization, to match the name of the saint that his devoted breed already bears. First he woke up the families in two apartments by his loud barking when a fire broke out, and then, having started the human beings on their hurried exodus to safety, he darted back through the smoke, got the family cat, which had been forgotten in the excitement, and reappeared with his tribal enemy in his mouth. Would all human beings have been so magnanimous?—Philadelphia Ledger.

Money invested in knowledge pays the best interest.

Inutile Fame.

"Why are you sure there is no Santa Claus?" asked the small boy.
"Because," answered the small girl, "if there were anybody with all that popular pull, he'd have been put up as a candidate for office years ago."

KILL THAT COLD

take a hot cupful of

For Irritated Throats

take a tried and tested remedy—one that acts promptly and effectively and contains no opiates. You get that remedy by asking for

PISO'S

NUT-BEARING TREES WILL YIELD COMFORTABLE PROFIT TO FARMER

These Butternut Trees Will Furnish Delight to Eye and Palate for Many Years.

(Prepared by the United States Department of Agriculture.)

They were gathered about the farmhouse fire in the mellow light of a swing lamp, and the head of the house sent his youngest son to the garret for butternuts. A little later, with an iron lapstone on his knees and hammer in hand, he was producing a rhythmic rap-rap-rap-crack-clink, as the crinkly brown shells split open and were tossed into a basin, exposing their delicately flavored twin meats.

"This is the last crop from that old tree," he remarked, thoughtfully, pausing after a few minutes of fascinating labor. "Rotted out, and the wind got it last night. And I have gathered nuts from that tree since I was a little tike in short breeches."

The hammer rested for a few moments, and the fingers of the farmer's left hand ran meditatively through the pile of richly laden shells.

"Fifty years," he mused. "Fifty springs I've seen the green come out on the leaves; fifty falls I or my children or grandchildren have picked up bushels of nuts; and fifty winters I've sat by the fire here and cracked them. That butternut tree has been a good old friend."

None to Take Its Place.

Yet, with all the pleasure that he had obtained from that tree, the farmer, thrifty in nearly everything, had no new butternut trees coming up to take the place of the patriarch, which the wind destroyed.

There are a number of nut-bearing species, say specialists of the United States Department of Agriculture, which grow as rapidly for shade as the maple or elm, and which will yield pleasure and some revenue for a quarter or half a century after the first few years of cultivation.

The butternut is now being produced by nurserymen and grows farther north than most other species. Butternut trees will bear in about eight years and form an attractive yard or roadside ornament, especially in the northern states.

More attention, however, is being paid to its relative, the black walnut. The late war made heavy inroads on the ranks of these fine old trees for gunstocks, airplane parts, and other material; but nurserymen already had begun to grow young trees to make up the loss.

The chestnut, which has been an important resource for centuries, is now one of the tragedies of freedom, due to the bark disease brought from Japan. The United States Department of Agriculture and various nut-culture associations are now working

to develop varieties which are blight-resistant.

The shagbark hickory makes a handsome shade tree, and quite a few varieties have been propagated. Shagbarks generally come into bearing after fifteen or twenty-five years. A few hickory trees planted now would be a comfortable resource for another generation.

The beech is a slow grower, and can scarcely be classed as a commercial nut, but is an attractive and homey tree where there is room for its spread. Beechnuts furnish dainties for an evening's chat, or left on the ground in woods and pastures, they furnish fattening material for pigs and turkeys. If the beech tree is headed low, it offers less chance for defacing its smooth bark with jack-knife hieroglyphics.

One other interesting nut tree is the filbert, or European hazel. It is one of our most tantalizing species, for while it can be made to grow in many parts of the North, no variety has yet been found to bear profitably east of the Rocky mountains, due to the fact that it flowers early and is caught by frost. In the Pacific Northwest it bids fair to soon become an important nut.

The pecan is easily the favorite and most important nut of American origin, prolific and profitable in the South and now being introduced well into northern states. Bearing pecan trees are not infrequent along the Atlantic coast as far north as New Jersey. Fine specimen trees are not uncommon in many northern states. Occasionally nuts mature on a few of the stray trees scattered about in the state of Michigan.

The Persian, commonly called English, walnuts can be grown in a few years. It does well in a limited way in certain sections of the East, especially along the Atlantic coast in eastern Maryland, Delaware and New Jersey. It is one of the important tree crops of California, and promises soon to become of considerable importance in the Pacific Northwest.

Almonds of some hard-shell varieties endure practically throughout the range of the beech. Japanese walnuts can be grown over a large part of the country.

Except on the Pacific coast and in the South, nut culture as a general thing is not recommended as a sure source of large income. However, there are many places where nut trees may as well be planted as other shade trees. And a grove of hardy nut trees is a heritage for the future well worth considering.

five feeding value of various hay mixtures will also be made.

The work is in charge of a specialist from the hay, feed and seed division of the bureau, and the laboratory has been established at 201 South Strand street, Alexandria, Va.

The equipment used includes separating tables especially constructed for this work, display tables for use in color determinations, and racks and boxes for holding the various type-samples as well as a hay cutter and a grinder operated by a 15-horsepower motor. These two machines cut and grind the hay to a degree of fineness suitable for making the moisture tests and chemical analysis. An electric drying oven, also constructed especially for the work, is used in the moisture tests and in reducing the hay to a uniform moisture content for the other analyses.

The standardization work is now well begun and it is expected that tentative grades for timothy and perhaps clover will be promulgated before the close of the fiscal year.

Rats destroy valuable feed.

HOW WOMEN AVOID SURGICAL OPERATIONS

Some Are Extremely Necessary, Others May Not Be

Every Woman Should Give Lydia E. Pinkham's Vegetable Compound a Trial First

Chicago, Ill.—"I was in bed with a female trouble and inflammation and had four doctors but none of them did me any good. They all said I would have to have an operation. A druggist's wife told me to take Lydia E. Pinkham's Vegetable Compound and I took 22 bottles, never missing a dose and at the end of that time I was perfectly well. I have never had occasion to take it again as I have been so well. I have a six room flat and do all my work. My two sisters are taking the Compound upon my recommendation and you may publish my letter. It is the gospel truth and I will write to any one who wants a personal letter."—Mrs. E. H. HAYDOCK, 6824 St. Lawrence Ave., Chicago, Ill.

A Vermont woman adds her testimony to the long line of those fortunate women who have been restored to health by Lydia E. Pinkham's Vegetable Compound, after it had been decided an operation was necessary:

Burlington, Vt.—"I suffered with female trouble, and had a number of doctors who said that I would never be any better until I had an operation. I was so bad I could hardly walk across the floor and could not do a thing. My sister-in-law induced me to try Lydia E. Pinkham's Vegetable Compound and it certainly has helped me wonderfully. I keep house and do my work and have a small child. I have recommended Vegetable Compound to a number of my friends and you may publish my testimonial."—Mrs. H. R. SHARON, Apple Tree Point Farm, Burlington, Vt.

In hospitals are many women who are there for surgical operations, and there is nothing a woman dreads more than the thought of an operation, and the long weary months of recovery and restoration to strength if it is successful.

It is very true that female troubles may through neglect reach a stage where an operation is the only resource, but most of the commoner ailments of women are not the surgical ones; they are not caused by serious displacements, tumors or growths, although the symptoms may appear the same. When disturbing ailments first appear take Lydia E. Pinkham's Vegetable Compound to relieve the present distress and prevent more serious troubles. In fact, many letters have been received from women who have been restored to health by Lydia E. Pinkham's Vegetable Compound after operations have been advised by attending physicians.

Lydia E. Pinkham's Private Text-Book upon "Allments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

Many School Children are Sickly

and take cold easily, are feverish and constipated, have headaches, stomach or bowel trouble.

MOTHER GRAY'S SWEET POWDERS FOR CHILDREN

Used by Mothers for over 30 years

Are pleasant to take and a certain relief. They tend to break up a cold in 24 hours, act on the Stomach, Liver and Bowels and tend to correct intestinal disorders and destroy worms. 10,000 testimonials like the following from mothers and friends of children telling of relief. Originals are on file in our offices:

"I think MOTHER GRAY'S SWEET POWDERS FOR CHILDREN are grand. They were recommended to my sister by a doctor. I am giving them to my little three year old girl who was very puny, and she is picking up wonderfully."

"We have used MOTHER GRAY'S SWEET POWDERS FOR CHILDREN at different times for past nine years, and always found them a perfect children's medicine and very satisfactory in every case."
